Summary

Final-year B.Tech (CS, AI Specialization) student graduating in June 2026 with experience in Full-Stack Web Development using React, Spring Boot, and MERN Stack. Completed internship at Pratham Software and developed a production-level Employee Appraisal Management System. Seeking a Software Engineer / Full-Stack Developer role to build impactful and scalable applications.

Skills

Languages: Java, C++, JavaScript, Python (Basics)

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, Spring Boot, REST APIs

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code

Coursework: DSA, DBMS, OOP, AI/ML

Education

Banasthali vidhyapith , Newai (Tonk)

July 2022 - June 2026

B.Tech in Computer Science with Specialization in Artificial Intelligence

CGPA: 8.74/10

Class 12th: 85.2% - BANASTHALI VIDYAPITH BOARD

Class 10th: 86.50% - RBSE BOARD

Work Experience

Role & Responsibilities – Java Full Stack Developer

Jan 2026 – June2026

Pratham Software – Jaipur

- Developed a full-stack **Employee Appraisal Management System** using **React.js, Java Spring Boot, and MySQL**, supporting **multi-role workflows for employees, managers, and HR teams**.
- Built **10+ responsive frontend modules** and implemented **REST APIs** for employee self-evaluation, review cycles, and feedback management.
- Integrated backend services and database operations to manage **100+ appraisal records** with secure and efficient data handling.
- Improved workflow efficiency by **reducing manual review and feedback tracking effort by ~30–40%** through process automation and structured evaluation flows.

Projects

E-Commerce Website | MERN Stack

- Developed a full-stack e-commerce application using MongoDB, Express.js, React, and Node.js supporting 30+ products.
- Implemented cart, checkout, and order management features handling 50+ sample orders.
- Designed and integrated 10+ REST APIs for frontend-backend communication.
- Built 10+ responsive UI components and an admin panel for product management.

Wildlife Monitoring System | Flutter, Python, Firebase, OpenCV

- Developed an AI-based mobile application for image enhancement and animal detection.
- Applied FSRCNN to improve image quality by ~20%.
- Integrated YOLO + OpenCV, improving detection accuracy by ~15%.
- Implemented automated reporting and managed 100+ records using Firebase.

Certificates

- Full Stack Web Development** – Internshala
- MERN Stack Development** – Regex Software
